

**North Canton Ohio July 22, 2022**

**Thermtrol Corporation IATF and ISO Certification Updates** – Thermtrol Corporation, a leading provider of wire harness serving the automotive, heavy vehicle off road, agriculture, industrial and medical industries announced today that both Thermtrol Corporation Headquartered in North Canton, Ohio, USA and their Thermtrol Vietnam facility, have successfully passed the IATF 16949 Re-certification Audit. The IATF Certification is the highest international quality standard within the automotive industry.

Thermtrol Vietnam facility also successfully completed the ISO 9001 and ISO 14001 surveillance audits. These international standards set out the requirements for a Quality Management System and Environmental Management System for quality-oriented organizations that are also environmentally responsible.

“The purpose of these globally renown certifications are to ensure that our customers can expect the highest level of commitment in terms of Quality, and Delivery from Thermtrol. This also enables Thermtrol to demonstrate the ability to consistently provide products and services that meet customer and regulatory requirements. This is a great accomplishment for our employees and a testimony that Thermtrol continues to be among the Best-In-Class wire harness assembly suppliers. I would personally like to thank one and all who contributed towards this achievement” said Mr. Puneet Wadhwa, Thermtrol Vice President – Global Quality.
